

- UR5WD

VHF level of development in Ukraine never gave hopes to reach a high place in VHF global competitions. The UT1I team proved that it is possible. Next year the UT5W team intends to surpass them and to show the best result on Ukraine in the competitions CQWWVHF in collective offset. We will make every effort for CQWWVHF development in the Western Ukraine.

Many years me interest possibility of work on VHF during my pedestrian travel on natural reserves according to the WFF program. Attracts me and work in tests. In Europe there are no such competitions in which it is possible to participate moving on foot. Thanks to the competitions CQWWVHF I have opportunity to unite all my hobbies and to receive double pleasure. I thank organizers for these fine competitions. I suggest to develop CQWWVHF having allowed to work in the category hiltoper not in a row six hours, and to give opportunity to the participant to break operating time into three parts, let us assume, for two hours, for work in the conditions of the best passing on range 50МГц and 144МГц. It will serve for attraction still bigger number of participants in the category hiltoper.

US3ITU

Competitions CQWWVHF the most democratic and attractive. Only in them there is an opportunity to work from the car. It is very interesting subgroup of competitions and moving from one QRA of a square to another always you find on VHF of new correspondents. In Europe only this year assume to enter similar test category. I hope that next year participants from Ukraine will be even more.

- US1ITU

The competitions CQWWVHF only which give the chance to work with any kind of radiation using thus any passing. In addition always there is an opportunity to choose the range on which at this time passing is better than days. The biggest advantage of these competitions is use of two VHF of ranges on which carrying out radio communications with the whole world is possible. Our UT1I command to seek to improve every year the used equipment. Such competitions as CQWWVHF give a push to further development of VHF in Ukraine.

UVICC-2013

The Ukrainian VHF a contest club (UVICC) propagandizes a radio communication on VHF in Ukraine. The most significant and popular competitions are CQWWVHF. These competitions are included in the general plan of competitions on radio sports in Ukraine. Holding annually internal meetings of fans of a radio communication on VHF, the club awards participants of CQWWVHF. The club, together with CQVHF committee, organized carrying out local competitions according to the CQWWVHF program. Results are annually brought and winners are awarded. Thanks to cooperation with CQVHF, the UVICC club involves every year more and more young people in participation in the competitions CQWWVHF. To a meeting in the father-in-law of 2014!
